

IMPACT CASE

ecoligo – Powerful impact investments

PROBLEM

With a rising awareness of the impact our finance and investment decisions have on the planet and its people, more and more eco-conscious individuals are looking to do good with their money.

But despite the growing demand for impact investments, consumers still struggle with finding transparent investment opportunities that generate both environmental and economic returns.

SOLUTION

- Impact investments into powerful solar projects for businesses in emerging markets. All of the available projects are owned and operated by ecoligo, providing an extra layer of security.
- Transparent and measurable CO₂ savings per investment. An average investor portfolio saves 18 tonnes of CO₂.
- No hidden fees and a minimum investment amount of only 100€.
- Attractive interest rates, ranging from 4.3% to 8%.

RESULTS

- Almost 4,000 investors have started to do good with their money by investing into ecoligo's solar projects.
- 83 projects have already been fully financed.
- 100% repayments to the investors made on time and in full.
